COMING EVENTS

Feb. 16—Lecture, "The Social Power Structure of the Small City" by Donald Call, 7:30 p.m., Lecture Hall 4.
Feb. 17—Student Recital, 3 p.m., Auditorium-Music Building 15.
Feb. 22—Founders Day.
Feb. 23—Inauguration of President Bunke.
Feb. 26—Art Film—"Knife in the Water" and "The Golden Fish," 8 p.m., College Auditorium.
March 2—Lecture, "When Is a City Sick?" by Eugene Johnson, 7:30 p.m., Lecture Hall 4.
March 4-6—"An Evening of Dance Theatre," Orchesis Dancers, 8:15 p.m., College Auditorium.
March 7—Faculty Recital, David Schaub, organist, 8:15 p.m., College Auditorium.
March 8—Band "Pop Concert," 3 p.m., Viking Lounge.
March 9—College Band Concert, 8:15 p.m., College Auditorium.
March 10—Student Recital, 3 p.m., College Auditorium.
March 12-13—"An Evening of Dance Theatre," Orchesis Dancers, 8:15 p.m., College Auditorium.
March 14—Choral Concert, 4 p.m., College Auditorium.
March 16—Lecture, "Intalco: A Case Study in Economic Self Help" by a panel from the Whatcom County Industrial Development Council, 7:30 p.m., Humanities Lecture Hall 4.
March 16-19—Final Examinations.
March 28—Bellingham Chamber Music Society Concert, 8:15 p.m., Viking Lounge.

Dr. Bunke Will Be Inaugurated
As Seventh President on Feb. 23

Dr. Harvey C. Bunke will be inaugurated as the seventh president of Western Washington State College on Feb. 23. The inauguration will follow the annual Founders Day ceremony on the evening of Feb. 22 when U.S. Supreme Court Justice William O. Douglas will give the keynote address.

Planned with an eye on dignity and pageantry, the inauguration will introduce some new symbols to the college's traditional lore. Among them is a pendant (see cut) designed by Fred Walsh of Seattle. It is cast in sterling silver with a gold flame in the center and the name of the college on both sides of the flame. The date of founding of the college, 1893, appears across the bottom.

The pendant will be attached to a two-inch wide blue velvet ribbon. It will be conferred upon President Bunke by Joseph Pemberton, chairman of the Board of Trustees, during the ceremonies as a symbol of the office of the presidency.

The names of former presidents of the college are inscribed on the reverse side.

A graphic design of the pendant, which appears in the upper left hand corner of this page, is being used on all publications that pertain to the inauguration. It is likely that the new design will replace the drawing of Old Main (which has been used in past issues of Western Reports to Parents) as the official college seal.

Invitations have been sent to nearly 2,000 colleges and universities in the United States and British Columbia asking them to send representatives of their institutions to the inauguration. Invitations also have gone to the governor, school superintendents in Washington, publishers, legislators, and other governmental and educational groups.

Inauguration Day will open with a colloquium panel on "The Economy of the Pacific Northwest" from 10:30 to noon in Humanities Lecture Hall 4. A no-host buffet luncheon will follow in the Viking Commons. The inaugural ceremony itself will begin with the academic procession from Carver Gymnasium to the auditorium at 2:15 p.m. The procession will include, in order, the Mace Bearer (Dr. James McAree), the Grand Marshal (Dr. Edward Neuzil), the Colors, the Faculty Marshals (Drs. Arthur Hicks and Bernard Boylan), the representatives of colleges and universities, Western faculty members, the Board of Trustees and the Presidential Party.

Western's Symphonic Strings, conducted by Dr. Paul Stoner, will play selections for the prelude, processional, and recessional. Dr. Bernard Regier will sing the National Anthem and Alma Mater.

After the invocation, greetings will be extended from the students, the alumni, the faculty, the other colleges and universities, the Board of Trustees, and the State of Washington. Formal induction of the President comes next, climaxing by Dr. Bunke's inaugural address. The proceedings will close with the benediction and recessional. A reception for the President will follow in the Viking Union.

Western is inviting both Justice Douglas' Founders Day address and the inaugural events. No tickets are required.
Justice William O. Douglas of the U.S. Supreme Court will give the keynote address at the annual Founders Day ceremony at Western Feb. 22.

Douglas also will receive the college's award as Distinguished Citizen of the State. The Distinguished Alumnus award will go to Dr. Burton W. Adkinson, head of the Office of Science Information Service for the National Science Foundation. He is a 1929 graduate of Western.

The keynote speaker last year was Sen. Wayne Morse of Oregon and the previous year he was Dr. Harold Taylor, former president of Sarah Lawrence College.

Founders Day was first celebrated three years ago to commemorate the occasion in 1893 when Gov. John McGraw signed into law a bill providing for a "normal school" in Whatcom County. The presentation of two awards during the observance gives the college an opportunity to recognize its alumni and other individuals who have made significant contributions to society.

Douglas, an outspoken conservationist, attended grade and high schools in Yakima and received his A.B. from Whitman College, Walla Walla, in 1920.

Two years later, he set out for New York, paying his fare by herding a carload of Chicago-bound sheep. He received his LL.B. from Columbia Law School in 1925.

During the next 12 years, Douglas was a member of the faculty of the Columbia Law School and later the Yale Law School. At Columbia, his specialty was the relation of law and business which led to a field study of "the facts of law and life among the natives"—meaning Wall Street. His work led to a reorganization of the New York Stock Exchange.

Douglas also conducted various studies of bankruptcy during the early years of the Depression for the U.S. Department of Commerce, the Yale Institute of Human Relations, and the National Commission on Law Observance and Enforcement. In 1939, while he was serving as chairman of Securities and Exchange Commission, President Roosevelt appointed him an Associate Justice of the Supreme Court.

Douglas' love of nature goes back more than 50 years when he suffered an attack of polio. After overcoming the illness, he was harassed by his friends for his spindly legs. He was determined to build them up by hiking and climbing in the Cascade wilderness and he has been doing it ever since.

Douglas has traveled widely and is the author of 14 books and numerous articles.

Founders Day serves this year as a prelude to the inauguration of President Harvey C. Bunke the following day. Parents are cordially invited to attend both events. Justice Douglas' address will be at 8 p.m. in the college auditorium. The presentation of awards will follow.

Some 35 students are finding work in newly created jobs on campus this quarter under an Economic Opportunity Act grant of $9,520. The grant was made by the Department of Health, Education, and Welfare as part of the Act's work-study program. All jobs are associated with the student's field of study.

The grant is for winter and spring quarters only. Additional funds will be available in succeeding quarters.

Western applied for the funds last month to create campus jobs for students from low-income families who are having financial trouble staying in college. Western is among the first colleges in the area to receive such a grant. The money is administered by the college with an additional 10 per cent of the grant provided locally.

Employment is limited to 15 hours per week while the college is in session and 40 hours a week during vacation periods. A student working all available time between the start of employment in February and June 9 could earn slightly more than $300, according to William T. Hatch, Financial Aids Director. All students receive $1 an hour, regardless of the job.

To be eligible for jobs under terms of the grant, students must be U.S. nationals (or intend to live in this country permanently); come from a low-income family or have no family; need the earnings to remain in college; be capable of maintaining good academic standing while employed; and be enrolled or accepted for enrollment as a full-time student (12 credit hours).

In determining eligibility, the college will take into consideration any income, assets and resources available to the student; income of the student's family; and the cost necessary for the student to remain at Western.

Revised enrollment forecasts prepared by the State Census Board have shifted upward dramatically the number of students Western can expect in the next six years.

In figures released recently, the Census Board reported that this college probably will enroll 5,200 students next fall and 6,600 by 1970. Both figures are up 600 over the original projections made last spring.

The revised forecasts are the result of a higher-than-expected enrollment this fall, greater retention of students, increased number of transfer students, and a large class of graduating high school seniors.

Barney Goltz, assistant to the president, said the projections mean that Western is about four years behind in its building program. Initially, the college did not expect to hit 6,000 until 1970. Now, it will be 1967 and possibly 1966. It also means the college will have tripled its enrollment in the decade 1957-67.

Goltz also said that the original operations budget request for the 1965-67 biennium has been increased by $1.3 million—from $14.1 million to $15.6 million—to meet the needs of a higher enrollment. The capital projects budget also was revised upward to $6,365,960.

Western has the highest proportion of increase from transfer students of any four-year college in the state.
The report said that Western has a net gain of 86, i.e., for every 100 students who transferred away from Western, 186 transferred to the institution.

The University of Washington was second in gain with 151 incoming transfers for every 100 outgoing. Central Washington State College was third, Eastern was fourth, and Washington State University was fifth.

All ten private colleges in the state had more undergraduates transferring away from their institutions than to them.

Winter quarter enrollment at Western is 4,280, a drop of 2.7 per cent from the 4,406 of fall quarter, according to a report released by Registrar William J. O'Neil.

O'Neil added that the drop is less than expected. Normally the decrease runs from 3 to 5 per cent.

The total enrollment includes 1,188 freshmen, 946 sophomores, 1,021 juniors, and 969 seniors. Graduate students, fifth year students, auditors and specials make up the remainder.

The balance between upper and lower division students is attributed to the high number of students who transferred to Western—572 in the fall and 144 this quarter. There are 43 entering freshmen this quarter.

Western's Ridgeway Dormitory Complex and the Viking Union have both won national awards for their architectural beauty. Both awards were made by the Community Facilities Administration and presented recently in Washington, D.C.

Ridgeway won one of three First Honor Awards given throughout the country while the Viking Union received one of 19 Awards of Merit.

Both structures were designed by Fred Bassetti of Seattle.

Students will have the option of paying spring quarter registration fees next month during preregistration, Registrar William J. O'Neil announced recently.

The early payment will be optional primarily because scholarship and loan funds are not available to students for early distribution.

Students who pay fees early will only have to pick up admit-to-class cards on registration day.

Architect's model shows the $1,450,000 women's dormitory which will be built on the northwestern end of the campus along High Street. Designed by Henry Klein of Mount Vernon, the nine-story structure will house 300 girls and is scheduled to open in September, 1966. A second dormitory, accommodating another 300 girls, will be built in the same area and will open in 1967.

Dr. Michael Mischakow (Economics-Business) is the author of a paper, "Balanced Economic Growth—An Appraisal" read for him at the International Seminar on Comparative Economic Developments in Medellin, Colombia.

Dr. Andrew Frank (Chemistry) was elected Counselor of the Puget Sound Section of the American Chemical Society during a recent meeting.

Dr. Morris Finder (English) is serving as linguistics consultant for a forthcoming revised edition of Webster's New World Dictionary, published by the World Publishing Company.

Dr. William C. Budd (College Examiner) is a member of the Advisory Committee of the National Council of Teachers of English.

Dr. Pat H. Atteberry (Industrial Arts) served as a joint chairman of a research committee studying the problem of "Youth Entering the Labor Market Directly from High School" at a recent meeting of the American Vocational Association in Minneapolis. He also is serving on a committee dealing with the accreditation of vocational technical instructors.

Manuscript Collections of the Poetry of Robert Huff (English) have been established at the University of Kentucky and Syracuse University.

Dr. Ralph Thompson, professor of Education at Western, recently was named Acting Academic Dean. The appointment was made by President Harvey C. Bunke, who arrived here Jan. 21. Thompson will serve until a permanent dean is selected. College officials say they hope to name someone by March 15 and expect he would begin work here next September.

Thompson fills a vacancy that opened last summer when Dr. Harold Chatland resigned to accept a major research position with the General Telephone Co. in California.

The Physics and Mathematics Departments have received combined grants totalling $101,540 from the National Science Foundation for support of summer institutes for secondary teachers.

Physics received $40,860. The institute will be under the direction of Dr. Raymond McLeod, chairman of the Physics Department.

The Mathematics institute, which will be under the direction of Dr. James McFarland, received $60,680.

Dr. Edward F. Neuzil of the Chemistry Department has received a grant of $4,600 from the Atomic Energy Commission for research entitled "Fission Studies on Elements Below Polonium." Part of the money will be used to support one undergraduate student as a research assistant. Neuzil plans to use the cyclotron at the University of Washington and the nuclear labs here.

Neuzil has received a total of $17,100 from the AEC during the past two years for his research.
Western will send a four-member team with one alternate and a faculty coach to participate in the General Electric College Bowl television program in New York May 16. All expenses will be paid by G.E., including flight, hotel, meals, a Broadway play of the team’s choice, and incidental costs.

The program will be live and in color at 5:30 p.m. on NBC-TV. Dr. Herbert C. Taylor, chairman of the Sociology-Anthropology Department, has been named the faculty coach.

A seven-member student committee has been set up to assist in the selection of team members. Western has been staging its own “College Bowl” the past two years with teams competing locally against one another and an All-Star team competing with those of other colleges in the state.

Machinery already in operation for the local version of “College Bowl” will be used to select the team to go to New York. Tony Tinsley, a senior from Federal Way, and Janeen St. Pierre, a sophomore from Issaquah, are co-chairmen of the Bowl competition.

The winning team in New York will receive $1,500 in scholarship money for the college and the losing team will receive $500. The winning team may continue to play a maximum of five games.

A one-minute color film of the campus will be shown during half-time with the team captain doing the narration.

The second annual “Course Evaluation Indicator,” sponsored by the Associated Students, was administered last quarter to students in nearly 50 classes.

The four-part evaluation takes students about ten minutes to complete. It concerns the textbook, examinations, course organization, and value of the course to the student.

The practice was started last year as a means of giving students a chance to express their opinions on classes they are taking. The decision of whether or not to administer the test, however, is up to the faculty member who teaches each class. All faculty were invited to take part in the evaluation.

John Skov, student legislator and chairman of the Academic Standards Committee, said the evaluation will be offered during the seventh or eighth week of each quarter so students will have enough knowledge about the course to answer questions from experience rather than hearsay. Faculty members, however, may ask to have it administered at any time and are invited to make suggestions for its improvement.

Results of each course evaluation are tabulated by the student administrator and sent directly to the faculty member along with the tests themselves. Results do not go to department chairmen or the administration. Faculty members are free to use the evaluation in any way they wish.

Ten Western students attended a conference on college teaching at the University of Washington last fall. The students were picked by Western faculty members on the basis of scholastic ability, promise of graduate study, and interest in college teaching as a career.

They attended seminars in their major fields, visited different departments at the university, and discussed
