## Exit Survey of Undergraduate Students Completing Degrees in Summer 2013, Fall 2013, Winter 2014 and Spring 2014

### EXECUTIVE SUMMARY

The Exit Survey of Undergraduate Students Completing Degrees in Summer of 2013 through Spring of 2014 is the sixth survey of graduating students conducted at Western Washington University. This survey is designed to illuminate departmental-, college-, and university-level information on student satisfaction, barriers to success, experiences in upper division courses, and post-graduation plans. The exit survey also includes questions submitted to the Office of Survey Research (OSR) by the Division of Enrollment and Student Services, Western Libraries, University Residences, the Vice Provost of Undergraduate Education, an ad hoc committee examining General University Requirements, the One World Strategic Team, and a group of questions addressing online courses. The Exit Survey consists of a mixture of open-ended, multiple-choice and numerical response questions. This report provides descriptive statistics of the multiple choice and numerical response questions.

This exit survey includes responses from undergraduates completing their degrees in summer 2013, fall 2013, winter 2014 and spring 2014. OSR initiated the Exit Survey during the fifth week of each quarter with an e-mail sent by the chair of the recipient's major department. This e-mail requested that respondents complete the Exit Survey using a link embedded within the e-mail. A follow-up e-mail from OSR was typically sent three days later to non-respondents and then the process was repeated to non-respondent's off-campus e-mail address about one week later. OSR then sent a reminder to internal email addresses the following week, and again to external addresses the subsequent week. Non-respondents were then contacted with phone call requests for their participation. This process ended the day before each quarter's graduation exercises. Of the 3,010 students graduating over this time, OSR received responses from 2,178, a response rate of 72.4%.

As with any voluntary survey, readers should be concerned about sample selection bias; that is bias which arises because survey respondents are not a random selection from the population of survey recipients. While sample selection bias for the Exit Survey is mitigated through proper survey techniques and a high response rate, its presence should be considered when evaluating the data. Section A of this document reports basic demographic and academic statistics of graduates who responded to the survey and compares these to non-respondents. As found in the general literature on surveys, women were more likely to complete the survey; 61.1% of respondents were women whereas 58.5% of graduates were women. Respondents were slightly better students as measured by the admissions index (average of 59.1 for respondents versus 58.1 for all graduates) and WWU GPA (average of 3.19 for respondents versus 3.17). In other ways, respondents and non-respondents were remarkably similar. The average and median age of respondents and non-respondents were nearly identical as were measures of first generation, transfer status, Washington residency, cumulative WWU credits earned, and credits taken during their final quarter on campus.

Section B of this report contains university-level summary statistics of each question asked. These data are then disaggregated by college in section C. In past reports of the Undergraduate Exit Survey, OSR has provided departmental-level summary statistics in this report. In place of the

department-level breakdown, OSR will publish an electronic pivot-table tool that will make these results available. The appendices to this report present count data on two of the open ended questions: “In what ways has Western exceeded your expectations?” and “In what ways has Western fallen short of your expectations?” Hopefully, this disaggregation of data will aid colleges and departments in their self-assessment efforts.

While OSR will leave it to the reader to decide what is informative or striking in this report, we undertake to point out some findings which the wider campus may find interesting. If provided the opportunity to start over, 84% of respondents would attend Western again; a number similar to those reported each year since OSR initiated exit surveys in 2009. Of those who would not attend Western again, the most frequently given reasons were that another school has a better program in the student’s field of study and the student felt a degree from another school would have been more valuable. It is important to note that these responses varied considerably across colleges with relative few Woodring students claiming another school had a better program. When asked about the length of time it took to graduate relative to their expectations at the time of enrollment, 67% of students claimed it took “less time than expected” or “as long as expected,”. For students who took longer to graduate than expected, the most frequently cited reasons for the delays were “I could not get the classes I needed” “I received poor advising prior to declaring my major” and “I changed my major.”

When asked about their upper division studies, 81% of students expressed a positive level of satisfaction with the knowledge and expertise of faculty and 83% were positively satisfied with the level of academic challenge. Fifty-six percent of students collaborated with a professor on a research or creative project outside, 68% of these students indicated that this experience contributed “quite a bit” or “a lot” to their learning.

The average student graduated with an educational debt of just over \$16,485, an increase of \$2000 over the prior year. However, this average hides the fact that 37% of graduates completed their education with no debt whatsoever. The average debt of those who did borrow was \$28,826, an increase of \$2,700 over the prior year. Fourteen percent of students indicated that their student loans impacted their decision to pursue a particular career.

Fifty-nine percent of students expect that their principal activity upon graduation will be full-time employment while 14% expect to work part-time. Of those expecting to work, 46% were looking for, but unable to find a job at the time of survey completion, one percentage point higher than the prior year. Thirteen percent of graduates hoped to attend a graduate program and of these, 42% had accepted an offer of admission.

Among the questions submitted by offices around campus, a number provide interesting information. For instance, 79% of students who enrolled in a WWU online course did so because of the schedule flexibility it provided. Among all students, 56% believe that they learn more in traditional courses relative to online ones, though only 20% of students believe that traditional courses give better grades than online courses.

In thinking back to their GUR experiences, only 12% of students “strongly agreed” that GUR courses helped make connections between different subject areas, 20% “strongly agreed” that GURs established an academic and intellectual foundation, and only 17% “strongly agreed” that these courses helped them choose a major or minor. Students did appreciate GUR courses that broadened their knowledge of subjects in which they already had interest, but 81% of students especially disliked taking GURs that have no connection to their major or minor.

One feature of the Exit Survey is that respondents are tracked using their W number which provides OSR the opportunity to merge the student data with Western's records and past OSR surveys. This ability profoundly opens the door to analysis of longitudinal issues that would otherwise be impossible. OSR is happy to share data or provide survey services upon request.

#### Clarifying Notes

1. Unless otherwise noted, percentages given are of the number responding to a question divided by the number asked that question. This denominator may contain fewer students than the total number responding to the survey due to question branching, random selection of respondents for certain questions, and survey attrition.
2. In many cases percentages do not sum to one hundred because of rounding.
3. A blank space indicates no respondent chose that response option. A report of 0% indicates that the percent of responses rounded down to, but is not equal with, zero.
4. This report presents responses from all students completing any question regardless of whether the respondent completed the survey or not.

### The Office of Survey Research

The Office of Survey Research provides high quality survey research and other applied social science research that supports the mission of Western Washington University. In particular, OSR surveys students, alumni, graduates, employers, and the campus community to provide valuable assessment data and analysis of reports which can be used for improvement of programs, instruction, faculty scholarship, and information services. OSR is responsible for developing and administering the Western Educational Longitudinal Study (WELS), Western's Alumni Surveys, and Western's exit surveys of graduating students.

## B. University-Level Responses

### Satisfaction

B.1. If you could start your higher education experience over, would you choose to:

N	2,178
Attend Western	84%
Attend a different university	14%
Not pursue a bachelor's degree at any school	2%

---

B.1.a. Why would you choose to attend a different university? Check all that apply. (Asked of respondents who answered "attend a different university" in B.1.)

N	309
I could have graduated more quickly from a different school	19%
I don't like Western's campus	5%
I don't like Western's students	18%
I don't like Western's quarter system	9%
I don't like Western's faculty members	14%
I became interested in a major that Western doesn't offer	23%
Another school has a better program in my field	46%
A degree from another school is more valuable	30%
Western's degree or major requirements were not what I expected or was led to believe	17%
Another school would have challenged me more than Western	26%
I feel like I settled for a second-rate experience when I should have tried harder to get into a better school	30%
Western is too big	2%
Western is too small	9%
Western is too far from home	10%
Western is too close to home	10%
Other	28%

## Satisfaction (cont.)

B.2. In what ways has Western exceeded your expectations? (Open-ended question asked in summer, fall and winter quarters.) (N=658) (Table of response categories provided in Appendix A, text responses available on request.)

B.3. In what ways has Western fallen short of your expectations? (Open-ended question asked in summer, fall and winter quarters.) (N=664) (Table of response categories provided in Appendix B, text responses available on request.)

B.4. Mark the box that best represents the quality of your relationships with people at Western, from "unfriendly, unsupportive, alienating" on one end to "friendly, supportive, inclusive" on the other. (Asked of 50% of summer, winter and spring quarter respondents at random. A technical problem with the survey interfered with data collection in fall quarter.)

	N	Unfriendly 1	2	3	4	5	6	Friendly 7
Relationships with other students	846	1%	2%	3%	9%	19%	28%	39%
Relationships with faculty members	844	0%	1%	4%	11%	24%	30%	31%
Relationships with administrative personnel and offices	846	3%	6%	9%	23%	23%	18%	18%

B.5. How satisfied are you with your experience at Western?

N	2,167
Very dissatisfied	2%
Dissatisfied	3%
Neither satisfied nor dissatisfied	11%
Satisfied	55%
Very Satisfied	28%

## Graduation Delays

B.6. Compared with what you expected when you first enrolled at Western, how long did it take for you to graduate? (Responses from winter and spring quarter graduates only. A problem with the survey instrument prevented meaningful interpretation of responses from summer and fall quarters.)

N	1,557
Less time than expected	12%
As long as expected	55%
More time than expected	33%

---

B.6.a. Which of the following factors were a minor or major reason for your graduation being delayed? Select only those that apply. (Responses from respondents who reported taking longer than expected to graduate in B.6.) (N=515)

	Not a reason	Minor reason	Major reason
I could not get the classes I needed	47%	30%	24%
I wanted to take a lighter course load	71%	22%	7%
I was advised to take a lighter course load	84%	13%	3%
I received poor advising prior to declaring my major	57%	21%	22%
I received poor advising from my major department	75%	16%	9%
I changed my major	60%	18%	23%
I was uncertain about which major to choose	57%	22%	21%
I lost credits when transferring from another institution	81%	10%	9%
I participated in a study abroad program	96%	3%	2%
I spent a lot of time working for pay	69%	17%	14%
I'm graduating with more than one major/minor	78%	8%	13%
My major required a high number of credits	65%	16%	19%
I completed an internship, practicum, student teaching, etc.	76%	12%	12%
I had a challenging financial situation	77%	13%	10%
I had personal health issues	84%	9%	8%
I had chemical dependency issues	98%	2%	0%
I had family or significant-other issues	83%	10%	7%
I was involved in student activities, athletics, etc.	87%	10%	4%
I took classes that didn't end up counting toward my degree requirements	51%	30%	19%
Other	83%	8%	9%
