Everyone needs an Advance Directive! Not everyone needs a POLST!

The **Advance Directive** and **Physician Orders for Life Sustaining Treatments (POLST)** are both important tools for documenting your wishes for care.

They are each designed to accomplish specific goals - it is important to understand who they are intended for and what they do!

The Advance Health Care Directive – aka – Advance Directive:

An Advance Directive always has two parts*:

- A) Durable Power of Attorney for HealthCare and
- B) Healthcare Directive, also known as Directive to Physicians.

*Many have a third part, a “Values Section”, where you can outline your priorities for guiding decisions.

Essential Facts about Advance Directives:

- 1) Names your Health Care Power of Attorney - the person who can speak for you anytime you cannot speak for yourself in a medical situation - **POLST does NOT allow for this.**
- 2) Outlines your wishes for care at the end-of-life when you are seriously ill- It can describe your “line in the sand”.
- 3) The healthcare directive takes effect when you are deemed terminally or irreversibly ill by two physicians.
 - As a legal document, it guides medical decisions made by your doctors and health care team.
 - As a legal document, **it cannot be “followed” as a medical order by emergency medical personnel.**
 - There are many versions of the Advance Directive.
 - **Everyone 18 years and older needs an Advance Directive.**

Physician Orders for Life Sustaining Treatments – aka – POLST:

POLST is a portable medical order that *takes effect as soon as it is signed!*

Essential Facts about POLST:

- 1) POLST is intended for people with serious illness and/or the medically frail at any age.
- 2) POLST must be signed by a physician, PA-C or ARNP to be valid. As a medical order, it can be quickly understood by all healthcare professionals, including first responders and emergency medical personnel.
- 3) POLST is a portable medical order; it is transferable to all healthcare settings. It remains valid as you transition from home into a medical setting, and back... to your home or other care setting, such as skilled nursing facility or long-term care home.
 - This form contains medical orders that specify the type of care you would like in the event of a medical emergency
 - **As medical orders, POLST can be followed by emergency medical personnel.**
 - Versions of POLST exist in many states; they vary slightly but may be honored across state lines in some instances.
