Report 1991-02: Systemwide Indicators for Western Washington University

This report presents information gathered from Western's Student Tracking System. Information compiled in this report is presented as tables and graphs, and has been categorized into three areas: baseline, intermediate assessment, and end-of-program assessment.

Three subcategories of baseline information are included: new student headcount enrollment, average gpa by entering class, and average precollege test scores by entering frosh. Each subcategory has been analyzed by admit status, gender, and ethnicity. Intermediate assessment addresses the issues of fall-to-fall retention rates of new students, also by admit status, gender and ethnicity. Finally, end-of-program assessment analyzes graduation rates, beginning with the fall, 1985, entering class--once again by admit status, gender, and ethnicity.
