This Event is brought to you for free and open access by the Conferences and Events at Western CEDAR. It has been accepted for inclusion in Salish Sea Ecosystem Conference by an authorized administrator of Western CEDAR. For more information, please contact westerncedar@wwu.edu.

SalishCenter.org

Dedicated to a Thriving Salish Sea

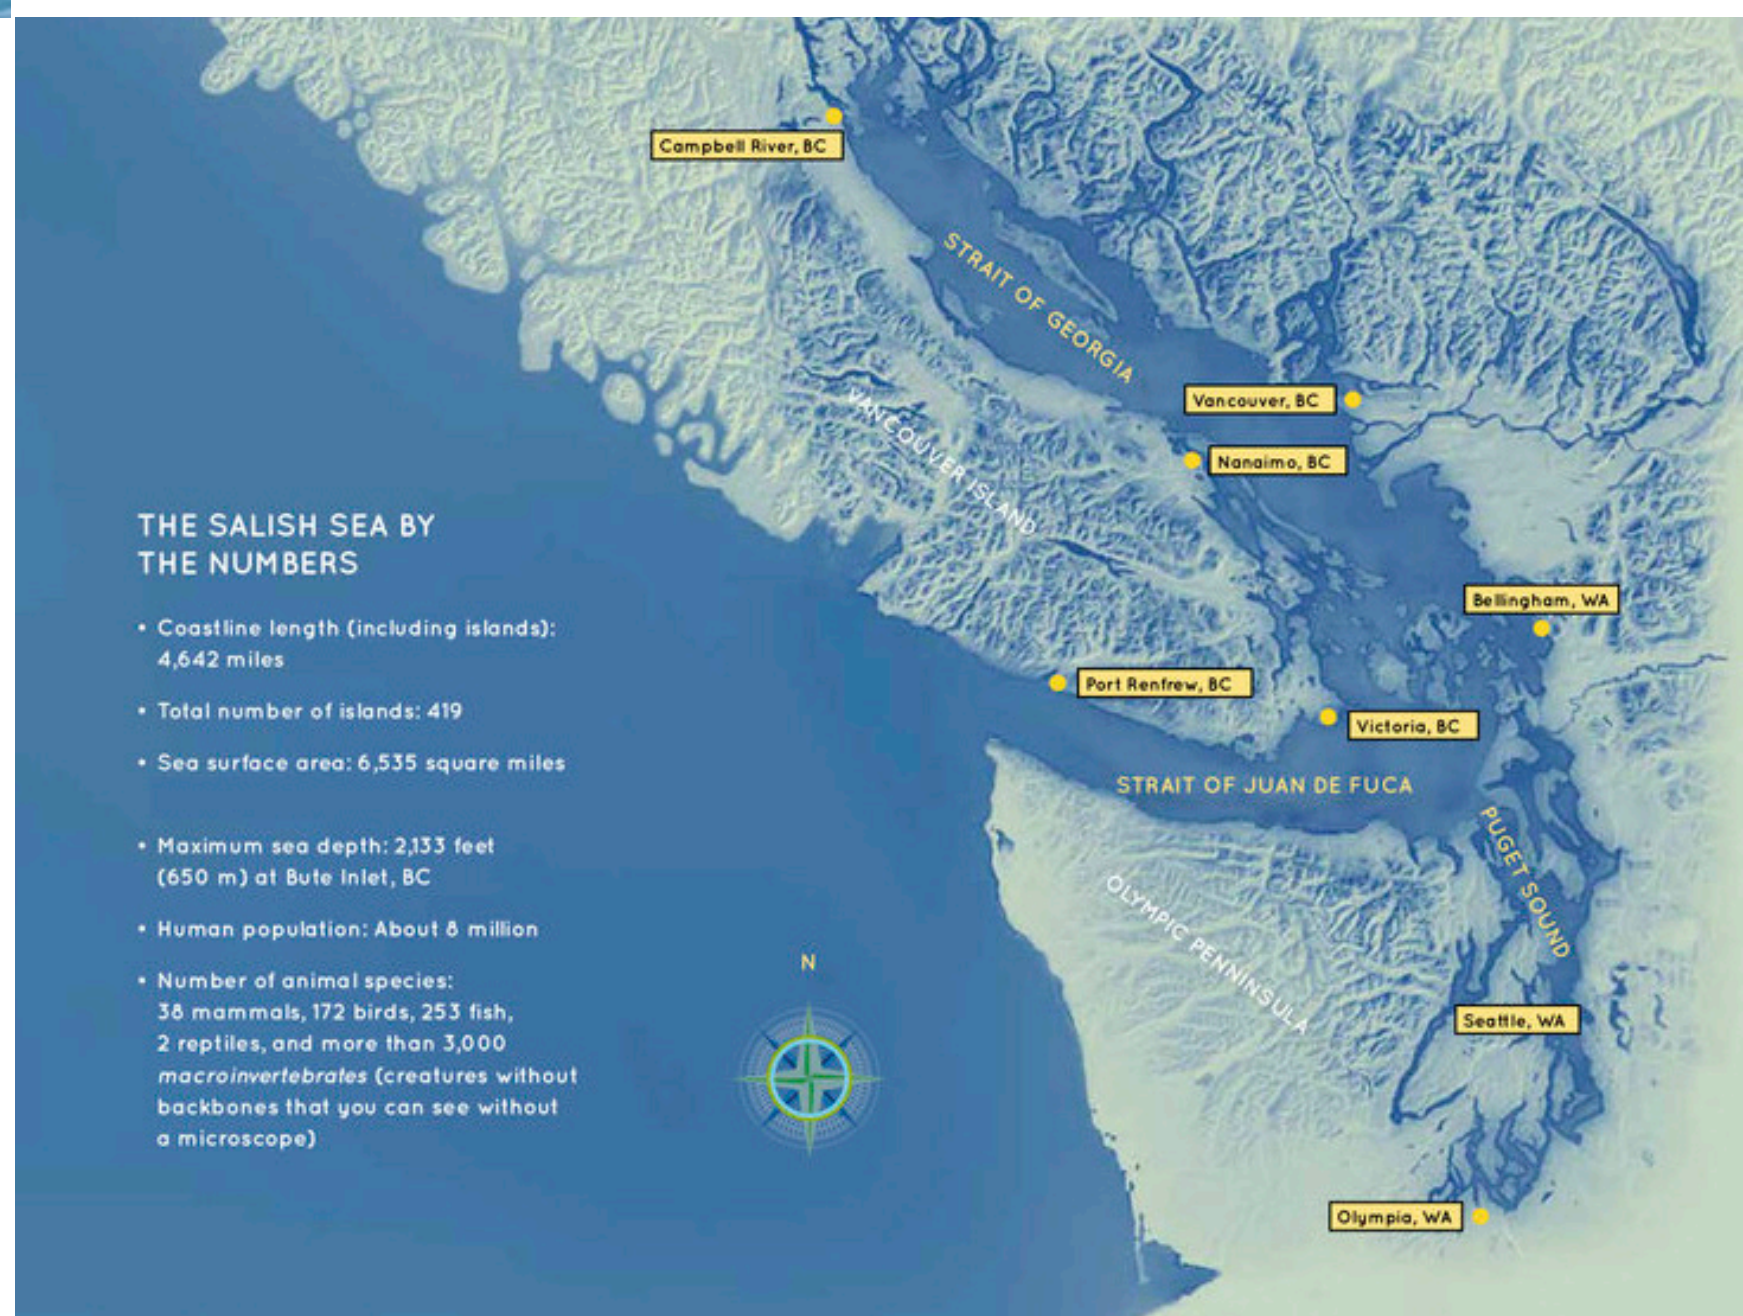

SalishCenter.org seeks to create a geographical destination called Salish Sea Certified. This controlled designation signifies that seafood harvested within the geographical boundaries of the Salish Sea, qualified to be designated as such. We are currently working with government and stakeholders to accomplish this important goal.

We believe that informed consumers will soon recognize the benefits of seafood harvested from local waters, and in turn, will be motivated to protect and improve the ecosystem of the Salish Sea. Our strong messaging and education strategy will give consumers an opportunity to develop a deep and meaningful relationship with local marine waters.

SalishCenter.org supports

- Sustainable Fishing in Puget Sound and the Salish Sea
- Sustainable Seafood Restaurants and Events
- Rebuilding a Thriving Southern Resident Orca Population
- Restoring Wild Salmon Habitats and Populations

We invite you to join us in this significant work. Together, we can make a difference
