OTHER RECENT PUBLICATIONS DEALING WITH INNER ASIA FROM THE CENTER FOR EAST ASIAN STUDIES

STUDIES ON EAST ASIA

[NEW]

Son of Heaven and Heavenly Qaghan: Sui-Tang China and its Neighbors, By Pan Yihong. 1997. xviii, 428 p., maps, bibliography, glossary-index. Original paperback edition. ISBN 0-914584-20-0. \$35. Volume 20.

The pioneering comprehensive work in English on late medieval Chinese foreign policy. The newly united China of Sui and Tang times confronted and attempted to exert hegemony over the nomadic Turks, the Tibetans and Three Kingdoms Korea. Dr. Pan shows how Sui and Tang drew inspiration from the tributary system of ancient and early medieval China, but adapted it pragmatically to fit new situations as they arose. After the disaster of the An Lushan rebellion of the 750s, Tang had to conclude equal treaties with frontier nations and even pay subsidies to some of them. This anticipated the new situation in which China found itself after the collapse of Tang and Song's restoration of a smaller united empire. Dr. Pan's discussion of the primary and secondary sources should be useful to future researchers of China's intercourse with foreign countries in late medieval times.

Opuscula Altaica: Essays Presented in Honor of Henry Schwarz, edited by Edward H. Kaplan and Donald W. Whisenhunt. 1994. xvi, 691 p., ill., bibliographies. Hardcover. ISBN 0-914584-19-7. \$85.00. Volume 19.

A collection of essays by thirty-three scholars from a dozen countries presented to Henry G. Schwarz on the occasion of his retirement from academic life. Most of them deal with subjects that Professor Schwarz has been deeply involved in during his long professional career, from Central Asia eastward through Mongolia and China's northern border areas to the Pacific Ocean.

EAST ASIAN RESEARCH AIDS AND TRANSLATIONS

An Uyghur-English Dictionary, by Henry G. Schwarz. 1993. xxv, 1083 p., ill., appendixes, bibliography. Hardcover. ISBN 0-914584-89-8. \$120.00. Volume 3.

With more than 18,500 main entries, 450 maps and illustrations, and extensive supplementary information, this is the first major dictionary that opens one of Inner Asia's key languages to English-speaking readers. Virtually all of the eight million Uyghurs live in China's huge Xinjiang region where they form the majority of an ethnically diverse population, and their language serves as the lingua franca for Uzbeks, Tajiks, and several other smaller ethnic groups.

"A monument of scholarship and dedication....this excellent dictionary has been thoughtfully designed to provide the reader with the maximum amount of information in an easily accessible form. Because it embraces so many precious gems of knowledge about Uighur language, people, culture, history (and even about other Turkic groups), I have found myself willingly turning to Schwarz's dictionary time and again simply to browse and be educated." *Sino-Platonic Papers*
